

# SAFETY DATA SHEET

# Multisciences Mouse TNF- $\alpha$ High Sensitivity ELISA Kit

### Section 1. Identification

GHS product identifier Code: Multisciences Mouse TNF-α High Sensitivity ELISA Kit, EK282HS Other means of identification: Not available Trade name: Mouse TNF-α High Sensitivity ELISA Kit Supplier/Manufacturer 3F, Building 2, No. 1688 Tianma Road, Times High Tech Park, Xiaoshan District, Hangzhou, Zhejiang Province, China. In case of emergency: Multisciences: 400-6721-600

### Section 2. Hazards identification

Section 2. Hazarus identi	Incation	
OSHA/HCS status:	Multisciences anti-Mouse TNF-α detect antibody(100X) Multisciences Mouse TNF-α Standard (lyophilized)	While this material is not considered hazardous by the OSHA Hazard Communication Standard (29 CFR 1910. 1200), this MSDS contains valuable information critical to the safe handling and proper use of the product. This MSDS should be retained and available for employees and other users of this product. While this material is not considered hazardous by the OSHA Hazard Communication Standard (29 CFR 1910. 1200), this MSDS contains valuable information critical to the safe handling and proper use of the product. This MSDS should be retained and available for employees and other users of this product.
	Multisciences PBS Buffer with Tween 20 (Assay, Diluent or Washing buffer)	While this material is not considered hazardous by the OSHA Hazard Communication Standard (29 CFR 1910. 1200), this MSDS contains valuable information critical to the safe handling and proper use of the product. This MSDS should be retained and available for employees and other users of this product.
	Multisciences Streptavidin-HRP (100x) and Substrate Reagent	While this material is not considered hazardous by the OSHA Hazard Communication Standard (29 CFR 1910. 1200), this MSDS contains valuable information critical to the safe handling and proper use of the product. This MSDS should be retained and available for employees and other users of this product.
	Multisciences Stop Solution	While this material is not considered hazardous by the OSHA Hazard Communication Standard (29 CFR 1910. 1200), this MSDS contains valuable information critical to the safe handling and proper use of the product. This MSDS should be retained and available for employees and other users of this product.
	Multisciences Amplification Reagent	While this material is not considered hazardous by the OSHA Hazard Communication Standard (29 CFR 1910. 1200), this MSDS contains valuable information critical to the safe handling and proper use of the product. This MSDS should be retained and available for employees and other users of this product.
	Multisciences Amplification Diluent	While this material is not considered hazardous by the OSHA Hazard Communication Standard (29 CFR 1910. 1200), this MSDS contains valuable information critical to the safe handling and proper use of the product. This MSDS should be retained and available for employees and other users of this product.
Classification of the substance or mixture:	Multisciences anti-Mouse TNF- $\alpha$ detect antibody(100X)	Not classified.
	Multisciences Mouse TNF-a Standard (lyophilized)	Not classified.
	Multisciences PBS Buffer with Tween 20 (Assay, Diluent or Washing buffer)	Not classified.
	Multisciences Streptavidin-HRP (100x) and Substrate Reagent	Not classified.
	Multisciences Stop Solution	Not classified.
	Multisciences Amplification Reagent	Not classified.
	Multisciences Amplification Diluent	Not classified.
GHS label elements		
Signal word	Multisciences anti-Mouse TNF-α detect antibody(100X)	No signal word.
	Multisciences Mouse TNF- $\alpha$ Standard (lyophilized)	No signal word.
	Multisciences PBS Buffer with Tween 20 (Assay, Diluent or Washing buffer) Multisciences Streptavidin-HRP (100x) and Substrate Reagent	No signal word. No signal word.
	Multisciences Stop Solution	No signal word.
	Multisciences Amplification Reagent	No signal word.
	Multisciences Amplification Diluent	No signal word.

Hazard statements	Multisciences anti-Mouse TNF-α detect antibody(100X)	No known significant effects or critical hazards.
	Multisciences Mouse TNF- $\alpha$ Standard (lyophilized)	No known significant effects or critical hazards.
	Multisciences PBS Buffer with Tween 20	No known significant effects or critical hazards.
	(Assay, Diluent or Washing buffer) Multisciences Streptavidin-HRP (100x) and Substrate Reagent	No known significant effects or critical hazards.
	Multisciences Stop Solution	No known significant effects or critical hazards.
	Multisciences Amplification Reagent	No known significant effects or critical hazards
	Multisciences Amplification Diluent	No known significant effects or critical hazards
Precautionary statements General	Multisciences anti-Mouse TNF- $\alpha$ detect antibody(100X)	Not applicable.
	Multisciences Mouse TNF- $\alpha$ Standard (lyophilized)	Not applicable.
	Multisciences PBS Buffer with Tween 20	Not applicable.
	(Assay, Diluent or Washing buffer) Multisciences Streptavidin-HRP (100x) and Substrate Reagent	Not applicable.
	Multisciences Stop Solution	Not applicable.
	Multisciences Amplification Reagent	Not applicable.
	Multisciences Amplification Diluent	Not applicable.
Prevention	Multisciences anti-Mouse TNF-α detect antibody(100X)	Not applicable.
	Multisciences Mouse TNF-α Standard (lyophilized)	Not applicable.
	Multisciences PBS Buffer with Tween 20 (Assay, Diluent or Washing buffer)	Not applicable.
	Multisciences Streptavidin-HRP (100x) and Substrate Reagent	Not applicable.
	Multisciences Stop Solution	Not applicable.
	Multisciences Amplification Reagent	Not applicable.
	Multisciences Amplification Diluent	Not applicable.
Deserves	Multisciences anti-Mouse TNF-a	Not applicable
Response	detect antibody(100X) Multisciences Mouse TNF-α Standard (lyophilized)	Not applicable. Not applicable.
	Multisciences PBS Buffer with Tween 20 (Assay, Diluent or Washing buffer) Multisciences Streptavidin-HRP (100x) and	Not applicable. Not applicable.
	Substrate Reagent Multisciences Stop Solution	Not applicable.
	Multisciences Amplification Reagent	Not applicable.
	Multisciences Amplification Diluent	Not applicable.
Channen	Multisciences anti- Mouse TNF-α	Notapplicable
Storage	detect antibody(100X)	Not applicable.
	Multisciences Mouse TNF-α Standard (lyophilized)	Not applicable.
	Multisciences PBS Buffer with Tween 20 (Assay, Diluent or Washing buffer)	Not applicable.
	Multisciences Streptavidin-HRP (100x) and Substrate Reagent	Not applicable.
	Multisciences Stop Solution	Not applicable.
	Multisciences Amplification Reagent	Not applicable.
	Multisciences Amplification Diluent	Not applicable.
Disposal	Multisciences anti-Mouse TNF-α	Not applicable.
	detect antibody(100X) Multisciences Mouse TNF-α Standard (lyophilized)	Not applicable.
	Multisciences PBS Buffer with Tween 20	Not applicable.
	(Assay, Diluent or Washing buffer) Multisciences Streptavidin-HRP (100x) and Substrate Reagent	Not applicable.
	Multisciences Stop Solution	Not applicable.
	Multisciences Amplification Reagent	Not applicable.
	Multisciences Amplification Diluent	Not applicable.
Supplemental label elements	Multisciences anti-Mouse TNF-α	None known.
	detect antibody(100X) Multisciences Mouse TNF-α Standard (lyophilized)	None known.

### SDS, Multisciences Mouse TNF- $\alpha$ High Sensitivity ELISA Kit

	Multisciences PBS Buffer with Tween 20 (Assay, Diluent or Washing buffer) Multisciences Streptavidin-HRP (100x) and Substrate Reagent	None known. None known.
	Multisciences Stop Solution	None known.
	Multisciences Amplification Reagent	None known.
	Multisciences Amplification Diluent	None known.
Hazards not otherwise classified	Multisciences anti-Mouse TNF- $\alpha$ detect antibody(100X)	None known.
	Multisciences Mouse TNF-α Standard (lyophilized)	None known.
	Multisciences PBS Buffer with Tween 20 (Assay, Diluent or Washing buffer)	None known.
	Multisciences Streptavidin-HRP (100x) and Substrate Reagent	None known.
	Multisciences Stop Solution	None known.
	Multisciences Amplification Reagent	None known.
	Multisciences Amplification Diluent	None known.

# Section 3. Composition/information on ingredients

Substance/mixture: Mixture		
Ingredient name	%	CAS number
Multisciences Mouse TNF-α Standard	99.9-100	-

Any concentration shown as a range is to protect confidentiality or is due to batch variation. There are no additional ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to health or the environment and hence require reporting in this section. Occupational exposure limits, if available, are listed in Section 8.

### Section 4. First aid measures

Section 4. First alu meas	ules	
Description of necessary first ai	d measures	
Eye contact	Multisciences anti-Mouse TNF-α	Immediately flush eyes with plenty of water, occasionally lifting the
,	detect antibody(100X)	upper and lower eyelids. Check for and remove any contact lenses.
		Get medical attention if irritation occurs.
	Multisciences Mouse TNF- $\alpha$ Standard (lyophilized)	Immediately flush eyes with plenty of water, occasionally lifting the upper and lower eyelids. Check for and remove any contact lenses. Get medical attention if irritation occurs.
	Multisciences PBS Buffer with Tween 20	Immediately flush eyes with plenty of water, occasionally lifting the
	(Assay, Diluent or Washing buffer)	upper and lower eyelids. Check for and remove any contact lenses. Get medical attention if irritation occurs. Immediately flush eyes
	Multisciences Streptavidin-HRP (100x) and	with plenty of water, occasionally lifting the
	Substrate Reagent	upper and lower eyelids. Check for and remove any contact lenses. Get medical attention if irritation occurs.
	Multisciences Stop Solution	Immediately flush eyes with plenty of water, occasionally lifting
		the upper and lower eyelids. Check for and remove any contact
		lenses. Get medical attention if irritation occurs.
	Multisciences Amplification Reagent	Immediately flush eyes with plenty of water, occasionally lifting the upper and lower eyelids. Check for and remove any contact
		lenses. Get medical attention if irritation occurs.
	Multisciences Amplification Diluent	Immediately flush eyes with plenty of water, occasionally lifting the upper and lower eyelids. Check for and remove any contact lenses. Get medical attention if irritation occurs.
Inhalation	Multisciences anti-Mouse TNF-α	Remove victim to fresh air and keep at rest in a position comfortable
	detect antibody(100X)	for breathing. Get medical attention if symptoms occur.
	Multisciences Mouse TNF-α Standard (lyophilized)	Remove victim to fresh air and keep at rest in a position comfortable
	Marking and DDC D. (feed the Target 20	for breathing. Get medical attention if symptoms occur.

Flush contaminated skin with plenty of water. Remove contaminated
clothing and shoes. Get medical attention if symptoms occur.

Wash out mouth with water. Remove victim to fresh air and keep at rest in a position comfortable for breathing. If material has been swallowed and the exposed person is conscious, give small quantities of water to drink. Do not induce vomiting unless directed to do so by medical personnel. Get medical attention if symptoms occur. Multisciences Mouse TNF-a Standard (lyophilized) Wash out mouth with water. Remove victim to fresh air and keep at rest in a position comfortable for breathing. If material has been swallowed and the exposed person is conscious, give small quantities of water to drink. Do not induce vomiting unless directed to do so by medical personnel. Get medical attention if symptoms occur. Multisciences PBS Buffer with Tween 20 Wash out mouth with water. Remove victim to fresh air and keep at (Assay, Diluent or Washing buffer) rest in a position comfortable for breathing. If material has been swallowed and the exposed person is conscious, give small quantities of water to drink. Do not induce vomiting unless directed to do so by medical personnel. Get medical attention if symptoms occur. Wash Multisciences Streptavidin-HRP (100x) and out mouth with water. Remove victim to fresh air and keep at rest in a position comfortable for breathing. If material has been swallowed and the exposed person is conscious, give small quantities of water to drink. Do not induce vomiting unless directed to do so by medical personnel. Get medical attention if symptoms occur. Wash out mouth with water. Remove victim to fresh air and keep at rest in a position comfortable for breathing. If material has been swallowed and the exposed person is conscious, give small quantities of water to drink. Do not induce vomiting unless directed to do so by medical personnel. Get medical attention if symptoms occur. Multisciences Amplification Reagent Wash out mouth with water. Remove victim to fresh air and keep at rest in a position comfortable for breathing. If material has been swallowed and the exposed person is conscious, give small quantities of water to drink. Do not induce vomiting unless directed to do so by medical personnel. Get medical attention if symptoms occur. Multisciences Amplification Diluent Wash out mouth with water. Remove victim to fresh air and keep at rest in a position comfortable for breathing. If material has been swallowed and the exposed person is conscious, give small quantities of water to drink. Do not induce vomiting unless directed to do so by medical personnel. Get medical attention if symptoms occur. Most important symptoms/effects, acute and delayed Potential acute health effects No known significant effects or critical hazards

Eye contact	detect antibody(100X) Multisciences Mouse TNF-α Standard (lyophilized)	No known significant effects or critical hazards. No known significant effects or critical hazards.
	Multisciences PBS Buffer with Tween 20 (Assay, Diluent or Washing buffer)	No known significant effects or critical hazards.
	Multisciences Streptavidin-HRP (100x) and Substrate Reagent	No known significant effects or critical hazards.
	Multisciences Stop Solution	No known significant effects or critical hazards.
	Multisciences Amplification Reagent	No known significant effects or critical hazards.
	Multisciences Amplification Diluent	No known significant effects or critical hazards.
Inhalation	Multisciences anti-Mouse TNF- $\alpha$ detect antibody(100X)	No known significant effects or critical hazards.
	Multisciences Mouse TNF-α Standard (lyophilized)	No known significant effects or critical hazards.
	Multisciences PBS Buffer with Tween 20 (Assay, Diluent or Washing buffer)	No known significant effects or critical hazards.
	Multisciences Streptavidin-HRP (100x) and Substrate Reagent	No known significant effects or critical hazards.
	Multisciences Stop Solution	No known significant effects or critical hazards.
	Multisciences Amplification Reagent	No known significant effects or critical hazards.
	Multisciences Amplification Diluent	No known significant effects or critical hazards.
Skin contact	Multisciences anti-Mouse TNF- $\alpha$ detect antibody(100X)	No known significant effects or critical hazards.
	Multisciences Mouse TNF- $\alpha$ Standard (lyophilized)	No known significant effects or critical hazards.
	Multisciences PBS Buffer with Tween 20 (Assay, Diluent or Washing buffer)	No known significant effects or critical hazards.
	Multisciences Streptavidin-HRP (100x) and Substrate Reagent	No known significant effects or critical hazards.
	Multisciences Stop Solution	No known significant effects or critical hazards.
	Multisciences Amplification Reagent	No known significant effects or critical hazards.

	Substrate Reagent Multisciences Stop Solution	No specific data.
	Multisciences Amplification Reagent	No specific data.
	Multisciences Amplification Diluent	No specific data.
Indication of immodiate modical	attention and special treatment needed	if pacescary, see toxicological information (Se

Indication of immediate medical attention and special treatment needed, if necessary, see toxicological information (Section 11)

Notes to physician	Treat symptomatically. Contact poison treatment specialist immediately if large quantities have been ingested or inhaled.
Specific treatments	No specific treatment
Protection of first-aiders	No action shall be taken involving any personal risk or without suitable training.

# Section 5. Fire-fighting measures

Extinguishing media		
Suitable extinguishing media	Multisciences anti-Mouse TNF-α detect antibody(100X)	Use an extinguishing agent suitable for the surrounding fire.
	Multisciences Mouse TNF- $\alpha$ Standard (lyophilized)	Use an extinguishing agent suitable for the surrounding fire.
	manascences mouse nur a standard (i) spinized/	
	Multisciences PBS Buffer with Tween 20 (Assay, Diluent or Washing buffer)	Use an extinguishing agent suitable for the surrounding fire.
	Multisciences Streptavidin-HRP (100x) and Substrate	Use an extinguishing agent suitable for the surrounding fire.

	Deservet	
	Reagent Multiccioncos Ston Solution	Use an extinguishing agent suitable for the surrounding fire
	Multisciences Stop Solution	Use an extinguishing agent suitable for the surrounding fire.
	Multisciences Amplification Reagent	Use an extinguishing agent suitable for the surrounding fire.
	Multisciences Amplification Diluent	Use an extinguishing agent suitable for the surrounding fire.
Unsuitable extinguishing media	Multisciences anti-Mouse TNF-α detect antibody(100X)	None known.
	Multisciences Mouse TNF- $\alpha$ Standard (lyophilized)	None known.
	Multisciences PBS Buffer with Tween 20	None known.
	(Assay, Diluent or Washing buffer) Multisciences Streptavidin-HRP (100x) and Substrate Reagent	None known.
	Multisciences Stop Solution	None known.
	Multisciences Amplification Reagent	None known.
	Multisciences Amplification Diluent	None known.
Specific hazards arising from the chemical	Multisciences anti-Mouse TNF-α detect antibody(100X)	In a fire or if heated, a pressure increase will occur and the container may burst.
	Multisciences Mouse TNF- $\alpha$ Standard (lyophilized)	In a fire or if heated, a pressure increase will occur and the container may burst.
	Multisciences PBS Buffer with Tween 20	In a fire or if heated, a pressure increase will occur and the container
	(Assay, Diluent or Washing buffer)	may burst. In a fire or if heated, a pressure increase will occur and
	Multisciences Streptavidin-HRP (100x) and	the container may burst.
	Substrate Reagent	
	Multisciences Stop Solution	In a fire or if heated, a pressure increase will occur and the container may burst.
	Multisciences Amplification Reagent	In a fire or if heated, a pressure increase will occur and the container
	Multisciences Amplification Diluent	may burst. In a fire or if heated, a pressure increase will occur and the container
		may burst.
Hazardous thermal decomposition products	Multisciences anti-Mouse TNF- $\alpha$ detect antibody(100X)	No specific data.
	Multisciences Mouse TNF-α Standard (lyophilized)	No specific data.
	Multisciences PBS Buffer with Tween 20	No specific data.
	(Assay, Diluent or Washing buffer) Multisciences Streptavidin-HRP (100x) and Substrate Reagent	No specific data.
	Multisciences Stop Solution	No specific data.
	Multisciences Amplification Reagent	No specific data.
	Multisciences Amplification Diluent	No specific data.
Special protective actions for fire-fighters	Multisciences anti-Mouse TNF-α detect antibody(100X)	Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any accuracity in the scene to exist the transition.
J. J	Multisciences Mouse TNF- $\alpha$ Standard (lyophilized)	personal risk or without suitable training. Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving
	Multisciences PBS Buffer with Tween 20	any personal risk or without suitable training. Promptly isolate the scene by removing all persons from the vicinity
	(Assay, Diluent or Washing buffer)	of the incident if there is a fire. No action shall be taken involving any
	Multisciences Streptavidin-HRP (100x) and Substrate Reagent	personal risk or without suitable training. Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable training.
	Multisciences Stop Solution	Promptly isolate the scene by removing all persons from the vicinity
	Multisciences Amplification Reagent	of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable training. Promptly isolate the scene by removing all persons from the vicinity
	Multisciences Amplification Diluent	of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable training. Promptly isolate the scene by removing all persons from the vicinity
Consist and other		of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable training.
Special protective equipment for fire-fighters	detect antibody(100X)	contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode.
	Multisciences Mouse TNF-α Standard (lyophilized)	Fire-fighters should wear appropriate protective equipment and self- contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode.
	Multisciences PBS Buffer with Tween 20 (Assay, Diluent or Washing buffer)	Fire-fighters should wear appropriate protective equipment and self- contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode.

	Multisciences Streptavidin-HRP (100x) and Substrate Reagent	Fire-fighters should wear appropriate protective equipment and self- contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode.
	Multisciences Stop Solution	Fire-fighters should wear appropriate protective equipment and self- contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode.
	Multisciences Amplification Reagent	Fire-fighters should wear appropriate protective equipment and self- contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode.
	Multisciences Amplification Diluent	Fire-fighters should wear appropriate protective equipment and self- contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode.
Section 6. Accidental release	se measures	
Personal precautions, protective eq	upment and emergency procedure	S
For non-emergency personnel	No action shall be taken involving any	personal risk or without suitable training. Evacuate surrounding areas. rsonnel from entering. Do not touch or walk through spilled material. Put

	on appropriate personal protective equipment.
For emergency responders	If specialized clothing is required to deal with the spillage, take note of any information in Section 8 on suitable
	and unsuitable materials. See also the information in "For non- emergency personnel".
Environmental precautions	Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers. Inform the
	relevant authorities if the product has caused environmental pollution (sewers, waterways, soil or air).

### Methods and materials for containment and cleaning up

Small spill	Stop leak if without risk. Move containers from spill area. Dilute with water and mop up if water-soluble. Alternatively, or if water-insoluble, absorb with an inert dry material and place in an appropriate waste disposal container. Dispose of via a licensed waste disposal contractor.
Large spill	Stop leak if without risk. Move containers from spill area. Prevent entry into sewers, water courses, basements or confined areas. Wash spillages into an effluent treatment plant or proceed as follows. Contain and collect spillage with non-combustible, absorbent material e.g. sand, earth, vermiculite or diatomaceous earth and place in container for disposal according to local regulations (see Section 13). Dispose of via a licensed waste disposal contractor. Note: see Section 1 for emergency contact information and Section 13 for waste disposal.

# Section 7. Handling and storage

Precautions for safe handling		
Protective measures	Multisciences anti-Mouse TNF-α detect antibody(100X)	Put on appropriate personal protective equipment (see Section 8). Put on appropriate personal protective equipment (see Section 8).
	Multisciences Mouse TNF-α Standard (Iyophilized) Multisciences PBS Buffer with	Put on appropriate personal protective equipment (see Section 8). Put on appropriate personal protective equipment (see Section 8).
	Tween 20 (Assay, Diluent or Washing buffer)	Put on appropriate personal protective equipment (see Section 6).
	Multisciences Streptavidin-HRP (100x) and	8). Put on appropriate personal protective equipment (see Section 8).
	Substrate Reagent	Put on appropriate personal protective equipment (see Section 8). Put on appropriate personal protective equipment (see Section 8).
	Multisciences Stop Solution	Put on appropriate personal protective equipment (see Section 8). Put on appropriate personal protective equipment (see Section 8).
	Multisciences Amplification Reagent	Put on appropriate personal protective equipment (see Section ) 8). Put on appropriate personal protective equipment (see Section )
	Multisciences Amplification Diluent	Put on appropriate personal protective equipment (see Section 8). Put on appropriate personal protective equipment (see Section 8).
Advice on general occupational hygiene	Multisciences anti-Mouse TNF-α detect antibody(100X)	Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Workers should wash hands and face before eating, drinking and smoking. Remove contaminated clothing and protective equipment before entering eating areas. See also Section 8 for additional information on hygiene measures. Eating,
	Multisciences Mouse TNF-α Standard (lyophilized)	drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Workers should wash hands and face before eating, drinking and smoking. Remove contaminated clothing and protective equipment before entering eating areas. See also Section 8 for additional information on hygiene measures. Eating, drinking and
	Multisciences PBS Buffer with Tween 20 (Assay, Diluent or Washing buffer)	smoking should be prohibited in areas where this material is handled, stored and processed. Workers should wash hands and face before eating, drinking and smoking. Remove contaminated clothing and protective equipment before entering eating areas. See also Section 8 for additional information on hygiene measures. Eating, drinking and
	Multisciences Streptavidin-HRP (100x) and Substrate Reagent	smoking should be prohibited in areas where this material is handled, stored and processed. Workers should wash hands and face before eating, drinking and smoking. Remove contaminated clothing and protective equipment before entering eating areas. See also Section 8 for additional information on hygiene measures.
	Multisciences Stop Solution	Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Workers should wash hands and face before eating, drinking and smoking. Remove contaminated

Workers should wash hands and face before eating, drinking and smoking. Remove contaminated
		clothing and protective equipment before entering eating areas. See also Section 8 for additional information on hygiene measures.
Conditions for safe storage including any incompatibilities	Multisciences anti-Mouse TNF-α detect antibody(100X)	Store in accordance with local regulations. Store in original container protected from direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials (see Section 10) and food and drink. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabeled containers. Use appropriate containment to avoid environmental contamination. Store in accordance with local regulations. Store in original container protected from direct sunlight in a dry, Store in accordance with local
	Multisciences Mouse TNF-α Standard (lyophilized)	regulations. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabeled containers. Use appropriate containment to avoid environmental contamination. Store in accordance with local regulations. Store in original container protected from direct sunlight in a dry, Store in accordance with local
	Multisciences PBS Buffer with Tween 20 (Assay, Diluent or Washing buffer)	regulations. Store in original container protected from direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials (see Section 10) and food and drink. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabeled containers. Use appropriate containment to avoid environmental contamination. Store in accordance with local regulations. Store in original container protected from direct sunlight in a dry, Store in accordance with local
	Multisciences Streptavidin-HRP (100x) and Substrate Reagent	regulations. Store in original container protected from direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials (see Section 10) and food and drink. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabeled containers. Use appropriate containment to avoid environmental contamination. Store in accordance with local regulations. Store in original container protected from direct sunlight in a dry,
	Multisciences Stop Solution	Store in accordance with local regulations. Store in original container protected from direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials (see Section 10) and food and drink. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabeled containers. Use appropriate containment to avoid environmental contamination. Store in accordance with local regulations. Store in original container protected from direct sunlight in a dry,
	Multisciences Amplification Reagent	Store in accordance with local regulations. Store in original container protected from direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials (see Section 10) and food and drink. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabeled containers. Use appropriate containment to avoid environmental contamination. Store in accordance with local regulations. Store in original container protected from direct sunlight in a dry,
	Multisciences Amplification Diluent	Store in accordance with local regulations. Store in original container protected from direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials (see Section 10) and food and drink. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabeled containers. Use appropriate containment to avoid environmental contamination. Store in accordance with local regulations. Store in original container protected from direct sunlight in a dry,

Section 8. Exposure controls/personal protection

### Control parameters Occupational exposure limits None

Appropriate engineering controls	Good general ventilation should be sufficient to control worker exposure to airborne contaminants.
Environmental exposure controls	Emissions from ventilation or work process equipment should be checked to ensure they comply with the requirements of environmental protection legislation. In some cases, fume scrubbers, filters or engineering modifications to the process equipment will be necessary to reduce emissions to acceptable levels.
Individual protection measures	
Hygiene measures	Wash hands, forearms and face thoroughly after handling chemical products, before eating, smoking and using the lavatory and at the end of the working period. Appropriate techniques should be used to remove potentially contaminated clothing. Wash contaminated clothing before reusing. Ensure that eyewash stations and safety showers are close to the workstation location.
Eye/face protection	Safety evewear complying with an approved standard should be used when a risk assessment indicates this is necessary to avoid exposure to liquid splashes, mists, gases or dusts. If contact is possible, the following protection should be worn, unless the assessment indicates a higher degree of protection: safety glasses with side- shields.
Skin protection	
Hand protection	Chemical-resistant, impervious gloves complying with an approved standard should be worn at all times when handling chemical products if a risk assessment indicates this is necessary.
Body protection	Personal protective equipment for the body should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.
Other skin protection	Appropriate footwear and any additional skin protection maturing this product.
Respiratory protection	performed and the risks involved and should be approved by a specialist before handling this product. Use a properly fitted, air-purifying or air-fed respirator complying with an approved standard if a risk assessment indicates this is necessary. Respirator selection must be based on known or anticipated exposure levels, the hazards of the product and the safe working limits of the selected respirator.

Section 9. Physical and chemical properties				
Physical state	Multisciences anti-Mouse TNF-α detect antibody(100X)	Solid		
	Multisciences Mouse TNF-α Standard (lyophilized) Multisciences PBS Buffer with	Liquid.		
	Tween 20 (Assay, Diluent or Washing buffer) Multisciences Streptavidin-HRP (100x) and Substrate Reagent	Liquid.		
	Multisciences Stop Solution	Liquid.		
	Multisciences Amplification Reagent	Liquid.		
	Multisciences Amplification Diluent	Liquid.		
Color	Multisciences anti-Mouse TNF- $\alpha$ detect antibody(100X)	Not available.		
	Multisciences Mouse TNF-α Standard (lyophilized) Multisciences PBS Buffer with	Not available.		
	Tween 20 (Assay, Diluent or Washing buffer) Multisciences Streptavidin-HRP (100x) and	Not available.		
	Substrate Reagent	Not available.		
	Multisciences Stop Solution	Not available.		
	Multisciences Amplification Reagent	Not available.		
	Multisciences Amplification Diluent	Not available.		
Odor	Multisciences anti-Mouse TNF- $\alpha$ detect antibody(100X)	Not available.		
	Multisciences Mouse TNF-α Standard (lyophilized) Multisciences PBS Buffer with	Not available.		
	Tween 20 (Assay, Diluent or Washing buffer) Multisciences Streptavidin-HRP (100x) and	Not available.		
	Substrate Reagent	Not available.		
	Multisciences Stop Solution	Not available.		
	Multisciences Amplification Reagent	Not available.		
	Multisciences Amplification Diluent	Not available.		
Flash point	Multisciences anti-Mouse TNF- $\alpha$ detect	Not available.

# Section 10. Stability and reactivity

Reactivity	Multisciences anti-Mouse TNF-α detect antibody(100X)	No specific test data related to reactivity available for this product or its ingredients.		
	Multisciences Mouse TNF-α Standard	No specific test data related to reactivity available for this product or		
	(lyophilized) Multisciences PBS Buffer with	its ingredients.		
	Tween 20 (Assay, Diluent or Washing buffer)	No specific test data related to reactivity available for this product or		
	Multisciences Streptavidin-HRP (100x) and	its ingredients.		
	Substrate Reagent	No specific test data related to reactivity available for this product or		
	Substrate Reagent	its ingredients.		
	Multisciences Stop Solution	No specific test data related to reactivity available for this product or its ingredients.		
	Multisciences Amplification Reagent	No specific test data related to reactivity available for this product or its ingredients.		
	Multisciences Amplification Diluent	No specific test data related to reactivity available for this product or its ingredients.		
Chemical stability	Multisciences anti-Mouse TNF-α detect antibody(100X)	The product is stable.		
	Multisciences Mouse TNF-α Standard (lyophilized) Multisciences PBS Buffer with	The product is stable.		
	Tween 20 (Assay, Diluent or Washing buffer) Multisciences Streptavidin-HRP (100x) and	The product is stable.		
	Substrate Reagent	The product is stable.		
	Multisciences Stop Solution	The product is stable.		
	•	1		
	Multisciences Amplification Reagent	The product is stable.		
	Multisciences Amplification Diluent	The product is stable.		

**MULTI SCIENCES** 

Section 11. Toxicological information Information on toxicological effects Acute toxicity: Not available.

Irritation/Corrosion: Not available. Sensitization: Not available. Mutagenicity: Not available. Carcinogenicity: Not available. Reproductive toxicity: Not available. Teratogenicity: Not available. Specific target organ toxicity (single exposure): Not available. Specific target organ toxicity (repeated exposure): Not available. Aspiration hazard: Not available. Information on the likely routes of exposure: Not available.

Potential acute health effects Eye contact: Not available. Inhalation: Not available. Skin contact: Not available. Ingestion: Not available.

#### Symptoms related to the physical, chemical and toxicological characteristics

Eye contact: Not available. Inhalation: Not available. Skin contact: Not available. Ingestion: Not available.

Delayed and immediate effects and also chronic effects from short and long term exposure Short term exposure: Not available. Potential immediate effects: Not available. Potential delayed effects: Not available. Long term exposure: Not available. Potential immediate effects: Not available. Potential delayed effects: Not available.

Potential chronic health effects: General: Not available. Carcinogenicity: Not available. Mutagenicity: Not available. Teratogenicity: Not available. Developmental effects: Not available. Fertility effects: Not available. Numerical measures of toxicity Acute toxicity estimates: Not available. Interactive effects: Not available. Other information: Not available.

### Section 12. Ecological information

Toxicity: Not available. Persistence and degradability: Not available. Bioaccumulative potential: Not available. Mobility in soil Soil/water partition: coefficient (Koc) Multisciences Multisciences

Not available. Multisciences anti-Mouse TNF- $\alpha$  detect antibody(100X) Not available. Multisciences Mouse TNF-α Standard (lyophilized) Multisciences PBS Buffer with Tween 20 (Assay, Diluent Not available. or Washing buffer) Multisciences Streptavidin-HRP (100x) and Substrate Not available. Reagent Multisciences Stop Solution Not available. Not available Multisciences Amplification Reagent Multisciences Amplification Diluent Not available

Mobility: Not available.

Other adverse effects: No known significant effects or critical hazards.

### Section 13. Disposal considerations

Disposal methods: The generation of waste should be avoided or minimized wherever possible. Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements. Dispose of surplus and non-recyclable products via a licensed

waste disposal contractor. Waste should not be disposed of untreated to the sewer unless fully compliant with the requirements of all authorities with jurisdiction. Waste packaging should be recycled. Incineration or landfill should only be considered when recycling is not feasible. This material and its container must be disposed of in a safe way. Empty containers or liners may retain some product residues. Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers.

### Section 14. Transport information

	DOT Classification	TDG Classification	Mexico Classification	ADR/RID	IMDG	ΙΑΤΑ
UN number UN proper shipping name	Not available. Not available.					
Packing group	-	-	-	-	-	-
Environmental hazards	No.	No.	No.	No.	No.	No. Additional
information	-	-	-	-	-	-

Special precautions for user: Transport within user's premises: always transport in closed containers that are upright and secure. Ensure that persons transporting the product know what to do in the event of an accident or spillage.

Transport in bulk according to Annex II of MARPOL 73/78 and the IBC Code: Not available.

### Section 15. Regulatory information

U.S. Federal regulations: TSCA 8(a) CDR Exempt/Partial exemption: Not determined United States inventory (TSCA 8b): Not determined. Hazardous Material Information System (U.S.A.)

The customer is responsible for determining the PPE code for this material. National Fire Protection Association (U.S.A.)

History

Date of issue/Date of revision: 6/11/2016 Date of previous issue: No previous validation. Version: 1

### Section 16. Other information

Key to abbreviations:

ATE = Acute Toxicity Estimate

BCF = Bioconcentration Factor

GHS = Globally Harmonized System of Classification and Labelling of Chemicals

IATA = International Air Transport Association

IBC = Intermediate Bulk Container

IMDG = International Maritime Dangerous Goods

LogPow = logarithm of the octanol/water partition coefficient

MARPOL 73/78 = International Convention for the Prevention of Pollution From Ships, 1973 as modified by the Protocol of 1978. ("Marpol" = marine pollution)

UN = United Nations
